

Medication Use and the Role of the Pharmacist

Presented by Wendy St. Peter, PharmD, FCCP, FASN, FNKF
Professor at the College of Pharmacy, Univ of Minnesota

November 15, 2018 at 2:00 PM Eastern

People with chronic kidney disease (CKD) often times take a lot of medicines and may have medication therapy problems.

This webinar will discuss:

- How pharmacists can help patients, doctors and other healthcare professionals to improve medication use in patients with CKD
- How patients can help their healthcare professionals stay 'on the same page' so that medication use can be optimized
- How your healthcare team can help you manage your medicines
